

The Times Secondary School
Dillibazar, Kathmandu
First Terminal Examination – 2076

Grade: XI	Set A	Full Marks: 100
Stream: Management (Morning Shift)		Pass Marks: 40
Subject: Economics		Time: 3 hrs.

Candidates are required to give their answers in their own words as far as practicable. The figures in the margin indicate the full marks

Attempt all questions

Group A

- Critically explain the welfare definition of economics. [10]
- Distinguish between microeconomics and macroeconomics. [5]

Or

Explain the subject matter of economics?

Write short answer of all questions: [5×2=10]

- What is meant by positive economics?
- Mention the characteristics of Robbins's definition.
- Define *Study of Material Welfare* according to Marshall's definition.
- What is meant by normative economics?
- Point out the scope of Micro-economics.

Group B

Answer any four questions: [4×5=20]

- What are the characteristics of developing countries?
- Explain the process of capital formation.
- Explain the indicators of economic development.
- Explain the types of unemployment.
- Distinguish between economic growth and economic development.

Group C

Answer any five questions: [5×5=25]

- Explain the current situation of transportation in the context of Nepal.
- What are the problems of water resource development in Nepal?
- What are the roles of forest resources in economic development Nepal?

- What are the consequences of deforestation in Nepal?
- What are the importances of mineral resource development in Nepal?
- What are the problems of communication in context of Nepal?

Group D

- Define Primary data. Explain the method of primary data collection with suitable example. 2+8

Solve any four questions: [4×5=20]

- Find the value of 'a' from the following data:

Varieties	0-10	10-20	20-30	30-40	40-50	50-60
Frequency	6	4	6	12	a	4

Given that the mean mark of set is 18.

- Find the median from the following data

Wage	0-19	20-39	40-59	60-79	80-99
Frequency	14	23	26	21	16

- Find the mode from the following data

Wage	0-10	10-20	20-30	30-40	40-50
Frequency	14	23	27	21	15

- Find the standard deviation from the following data.

Wage	0-10	10-20	20-30	30-40	40-50	50-60
Frequency	4	6	10	20	6	4

- Find the 6th decile and 80th percentile from the following data:

<i>C-I</i>	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80
<i>f</i>	5	8	7	12	28	20	10	10

The End

The Times Secondary School
Dillibazar, Kathmandu
First Terminal Examination – 2076

Grade: XI **Set B** **Full Marks: 100**
Stream: Management (Morning Shift) **Pass Marks: 40**
Subject: Economics **Time: 3 hrs.**

Candidates are required to give their answers in their own words as far as practicable. The figures in the margin indicate the full marks

Attempt all questions.

Group A

1. Critically explain the Robbin's definition of economics. [10]
2. Distinguish between positive and normative economics. [5]

Or

Explain the characteristics of classical definition of economics?

Write short answers of all questions: [5×2=10]

3. What is meant by macroeconomics?
4. List out subject matter of economics.
5. Mention the characteristics of marshal's definition.
6. Mention the criticism of wealth definition.
7. Define *economic man* according to wealth definition.

Group B

Answer any four questions: [4×5=20]

8. Explain the process of capital formation.
9. Explain the indicators of economic development.
10. What are the characteristics of developing countries?
11. Distinguish between economic growth and economic development.
12. Explain the types of unemployment.

Group C

Answer any five questions: [5×5=25]

13. Explain the current situation of mineral resources of Nepal.
14. Explain the potentiality of hydro-electricity in Nepal.
15. Explain the roles of communication in development of Nepal.
16. What are the roles of forest resource in economic development of Nepal

17. What are the causes of deforestation in Nepal?
18. What are the problems of transportation development in Nepal?

Group D

19. Define secondary data. Explain the various sources of secondary data? [2+8=10]

Solve any four questions:

[4×5=20]

20. Find the value of 'a' from the following data

Marks	5	7	9	11	a	15	20
No. of students	4	4	4	7	3	2	1

If given mean mark is 10.

21. Find the median of the following data:

<i>C-I</i>	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80
<i>f</i>	5	8	7	12	28	20	10	10

22. Find the mode from the following data.

Wage	30-40	40-50	50-60	60-70	70-80	80-90
Frequency	4	3	8	11	6	2

23. Find the standard deviation from the following data

Wage	0-10	10-20	20-30	30-40	40-50
Frequency	8	13	16	8	5

24. Find the 8th decile and 96th percentile from the the following data:

<i>C-I</i>	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80
<i>f</i>	5	8	7	12	28	20	10	10

"BEST OF LUCK"
